Projects

Project Director & Game Designer | BrokenLevenHeart (CCG)

February 2025 - October 2025

- Directed the design of an original collectible card game, developing its core mechanics, player interaction, systems, rules and Lore. Authored the Game Design Document covering the playable system architecture and Game Logic support by the visual prototype.

  Key Skill: Game Systems Design, Creative direction, Game Documentation, Gameplay Mechanics & design, Prototyping in Early Phase

Lead Developer | Obscure Engine

April 2026 - June 2026

- develop a custom Command-Line Game development and prototyping framework in C# and C++ use to research pure C#, Game Systems, Architecture and Prototyping in custom environments.

  Key skills: C# and C++ Development, Modular Architecture, Software Research, Procedural Systems, Technical Prototyping

Narrative Design | Chronostasis: Kingdom of chains

2018 - present

- Developing a long-form narrative saga that has expanded into an interconnected fictional universe, the project explore from Worldbuilding to Character development, Long form storytelling and the adaptation of literary narrative to game experience

  Key skills: Worldbuilding, Character Development, Narrative design, Long-form Storytelling, Narrative adaptation.

Education

Software Engineering (Coursework) | Universidad Fidélitas

2025

Key Focus: fundamental Software Architecture,System Design and Data Structures.

Bachelor in Digital Animation| Universidad Latina de costa rica

August 2025 - Present

Key Focus: Video Production, Audio Production & 2D animation

Skills

Programing Languages & Graphics

- C#,C++,Python,Lua
- GLSL / OpenGL

Game Engines

- Unity
- Godot

Software & Development Tools

- Visual Studio Code, Jetbrains Rider
- Git, Github
- Blender (Basic)
- FL Studio,Musescore
- Adobe Audition,Audacity

Technical & Creative Skills

- Game System Design
- System Architecture & technical documentation
- Game Mathematics & Linear Algebra

Project Management

- Agile Methodologies for Software Development
- Task Coordination
- Requirements in software development

EXPERIENCE

Orchestral Composer & Audio Designer | Wildoria

2026 — Dates to be confirmed

- Composed orchestral music and created sound effects for a video game project.
- Contributed to game audio planning and overall musical direction.

Musical Composer & Audio Designer | FNF vs Chuysmik — Beta 1.5

September 2025 – December 2025

- Analyzed the existing soundtrack, identified technical and structural issues, and documented findings and proposed solutions.
- Composed and produced music for narrative interludes featuring in-game dialogue, supporting atmospheric and narrative consistency.

Project Director & Game Designer | Broken Leven Heart (CCG)

February 2025 – October 2025

- Directed the design of an original collectible card game, defining core mechanics, card systems, player interactions, and gameplay rules.
- Authored comprehensive game design documentation covering system architecture and gameplay logic.
- Developed and refined a tabletop prototype through iterative design and conceptual testing.

Musical Composer | Gummies Candy — Resistance Entertainment

March 2023

- Composed and produced four original soundtrack tracks within a 48-hour production window.
- Transitioned from comic writing to music production to address an urgent project need.

Achievements

Engine Architecture: Develop a custom command line Game development framework using C# and C++ focuses on modular architecture.

Procedural system & Technical development: Research and prototyped gameplay systems. including procedural map generation, gameplay AI and 2D isometric spatial logic

Project Coordination & documentation: organized Development task and produced technical documentation for game systems, mechanics, and software architecture.

Creative-technician integration: Combined Programing, Game System design, Creative development to translate gameplay concepts into technical implementation
